Letter of Recommendation

To Whom It May Concern,

I am pleased to write this letter of recommendation for Mr. Jagpreet Singh Mittu, who completed a 13-week AI & Machine Learning Internship with Sedha Consulting Pte Ltd, Singapore, from 01 February 2026 to 01 May 2026 under my supervision.

During his internship, Jagpreet worked on the design and development of an AI-driven Talent Intelligence solution, where he applied concepts from Machine Learning, Natural Language Processing (NLP), and Generative AI to solve practical problems in candidate screening and evaluation.

One of Jagpreet's key strengths is his ability to translate theoretical knowledge into working systems. He successfully developed a full-stack AI dashboard using Python and Streamlit, integrating multiple components such as machine learning models, semantic similarity engines, and GenAI-based evaluation modules into a cohesive application.

From a technical standpoint, Jagpreet demonstrated a solid understanding of core Machine Learning principles. He implemented a Support Vector Machine (SVM) classifier for resume categorization and built a semantic matching engine using SpaCy embeddings and cosine similarity. Notably, he went beyond basic keyword-based approaches and attempted to design a more meaningful, context-aware matching system.

In addition, Jagpreet explored modern AI capabilities by integrating a Generative AI component (Llama 3.1 via API) to generate candidate assessments and identify skill gaps. This reflects both his curiosity and willingness to experiment with emerging technologies.

What stood out most during his internship was his structured approach to problem-solving. He was able to break down complex tasks into manageable components, iterate on his solutions, and incorporate feedback effectively. He also maintained good documentation and was able to clearly explain his work during review sessions.

From a professional standpoint, Jagpreet was reliable, disciplined, and receptive to feedback. He maintained consistent communication, met expected deliverables, and demonstrated a genuine interest in learning and improving his work.

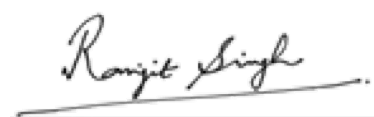

In my view, Jagpreet has a strong foundation in AI/ML and the right mindset to grow further, whether in advanced academic programs or industry roles involving data, AI, or software engineering. With continued exposure and refinement, he has the potential to develop into a capable and thoughtful technology professional.
